4. FIRST AID MEASURES

In case of skin contact: Remove contaminated clothing immediately and dispose of safely. After contact with

skin, wash immediately with soap and plenty of water.

In case of eyes contact: After contact with the eyes, rinse with water with the eyelids open for a sufficient length

of time, then consult an ophthalmologist immediately. Protect uninjured eye.

In case of Ingestion: Do NOT induce vomiting.

In case of Inhalation: Remove casualty to fresh air and keep warm and at rest. If breathing is irregular

or stopped, administer artificial respiration. In case of inhalation, consult a doctor

immediately and show him packing or label.

4.2 Most Important symptoms and effects, both acute and delayed

None known

4.3 Indication of any immediate medical attention and special treatment needed

In case of accident or un-wellness, seek medical advice immediately (show directions for use or safety data sheet if possible).

5. FIRE FIGHTING MEASURES

Suitable extinguishing media: CO2, powder extinguisher, foam, water spray. Extinguishing media which must not be used for safety reasons: Water jet.

5.2 Special hazards arising from the substance or mixture

Burning produces heavy smoke. Burning releases carbon monoxide, carbon dioxide, oxides of nitrogen, isocyanate vapours and traces of hydrogen cyanide. In the event of fire and/or explosion do not breathe fumes.

5.3 Advice for fire-fighters

Use suitable breathing apparatus. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Move undamaged containers from immediate hazard area if it can be done safely.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions: Remove all sources of ignition. Wear personal protection equipment. Wear

breathing apparatus if exposed to vapours/dusts/aerosols. See protective

measures under point 7 and 8.

6.2 Environmental precautions

Environmental precautions: Retain contaminated washing water and dispose it. In case of gas escape or of

entry into waterways, soil or drains, inform the responsible authorities.

6.3 Methods and material for containment and cleaning up

Clean-up procedures: Suitable material for collection: inert absorbent material (e.g. sand, vermiculite)

6.4 Reference to other sections

Reference to other sections: See also section 8 and 13

7. HANDLING & STORAGE

Handling requirements: Use localized ventilation system. Don't use empty container before they have

been cleaned. Before making transfer operations, assure that there aren't any incompatible material residuals in the containers. Contaminated clothing should be changed before entering eating areas. Do not eat or drink while working. See also

section 8 for recommended protective equipment.

7.2 Conditions for safe storage, including any incompatibilities

Storage conditions: Keep away from unguarded flame, sparks, and heat sources. Avoid direct exposure

to sunlight. Keep away from food, drink and feed. See chapter 10.5 Instructions as regards storage premises: Keep container tightly closed in a cool, well-ventilated

place, away from heat.

7.3 Specific end use(s)

Specific end use(s): See section 1.2.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

8.2 Exposure controls

Eye protection: Use close fitting safety goggles, don't use eye lens.

Skin protection: Use clothing that provides comprehensive protection to the skin, e.g. cotton, rubber, PVC

or viton.

Hands protection: Use protective gloves that provides comprehensive protection, e.g. NBR (nitrile rubber),

FKM (fluoro rubber). The selection of suitable gloves does not only depend on the material, but also on other quality characteristics and varies from manufacturer to

another one, and on the manner and times of use of the mixture.

Respiratory protection: Use adequate protective respiratory equipment.

Environmental exposure controls: See chapter 6.2
